

# Journey to a thriving world with the SDGs

We've joined the global movement to contribute to the UN Sustainable Development Goals (SDGs), setting ambitious targets in areas where we believe Sappi can have the biggest impact.

As an energy-intensive business, we're especially focused on goal **#7**, affordable and clean energy, which also contributes to climate action, **#13**.

In addition to our 2025 targets, we're setting science-based emission reductions targets for 2030. Our regional decarbonisation plans are guiding progress. Discover some of the projects big and small on Sappi Europe's journey towards a thriving world.

**11** % points increase share of renewable and clean energy.

**5** % reduction in specific total energy.

**25** % decrease specific GHG (Scope 1 + 2 emissions.)

Have an idea or proposal to share? The Sustainability Team wants to hear from you!
